

Cuvée Systems Releases Unique Compact Round In-Track LED Driver

Sunnyvale, Calif., October 20, 2022, [Cuvée Systems®](#) in partnership with Luminus, has announced its newest addition to the EZI-Set family of compact drivers – the DITR round in-track driver. The EZI-Set DITR series provides a unique, round form factor in-track driver suited for track mounted pendants, downlights and area lights as well as conventional track lights. In contrast to a long, in-track driver, the compact 57mm diameter form factor complements the design of round light fixtures making them integrate well into the surrounding environment. This driver offers a wide range of dip-switch configurable current settings and flicker-free performance that together translate to a high quality of light and reliability. Like all Cuvée products, they are designed for use with Luminus COBs as well as other light sources from 30-38V and are programmable from 400-700mA. The round in-track driver carries the usual 5-year limited system warranty in combination with compatible Luminus COBs, and is ENEC certified. While other driver companies struggle to deliver, Cuvée continues to offer delivery from stock or short lead times, and these new EZI-Set DITR round drivers are available now.

For a full list of features and applications visit <http://cuveesystems.com/solution-portfolio/ezi-set-compact-drivers/>. The Cuvée Systems brand of drivers are exclusively available from [Luminus](#) and the Luminus worldwide franchised distributor network.

About Cuvée Systems

Cuvée Systems is on a mission to bring the most innovative power electronics to life. Our focus is on combining world class design, high-volume manufacturing, and in-depth application experience to create sleek, reliable, high performance power electronics for the lighting industry. Cuvée has business hubs in Sunnyvale, CA and Xiamen, China enabling the best of both worlds with the talent and leading-edge technology in the Silicon Valley while leveraging the manufacturing prowess and economics of our China based production factories. We bring power-to-light solutions that enable the next generation lighting systems. www.cuveesystems.com
